

## 3° Radial Collimator

### Technical Characteristics:

- Individually tensioned foil assemblies
- Angular spacing of foil centres 3°
- Apertures: 56
- Overall Angular Span: 168°
- Foils 55 Mylar 0.075mm
- Absorber: B104C: 0.115mm per side
- Total foil thickness: 0.3mm
- Foil Height: 210mm
- Mean Foil Length: 270mm
- Inside radius: 94mm
- Outside Radius: 364mm
- Total Collimator Height: 352mm
- Total Collimator Length 732mm
- All blind holes: Air release
- All fixings Stainless Steel
- Protection Covers: Front & Back

Manufactured for: LANL USA.
